SKILLS

- Java, Spring Boot, Node.JS, Express.JS, SQL, GraphQL, JavaScript, React.JS, SAP-UI5
- Cloud CI/CD, AWS, Docker, Jenkins, Kibana, Dynatrace, Elasticsearch
- Agile SDLC, Git, Jira, Conversational AI, LLMs, Document Grounding, RAG

EXPERIENCE

Developer - [SAP Labs](#) April, 2025 - Present

- Building **Business AI for SAP Concur** using cutting-edge LLMs, document grounding and agent orchestration to enhance travel and expense management for **~60,000 global users**.
- Leading Microsoft **Teams integration with SAP Joule**, enabling conversational expense workflows directly within enterprise Teams and Copilot channels.
- Designing and developing **event-driven microservices** using Node.js, Spring Boot, GraphQL, and cloud-native architectures with built-in security, observability, and AI governance.
- **Leading product security** as the team SPOC by integrating SonarQube, Checkmarx and Mend scans into project security pipelines, managing vulnerabilities, and overseeing compliance.
- Owning the end-to-end release lifecycle, including product pipelines, quality gates, and production deployments, while leveraging Dynatrace observability and usage metrics to drive data-informed product decisions.
- Serving as Change Champion, driving communication and alignment across product stakeholders, engineering teams, and leadership.

Developer Associate - [SAP Labs](#) Aug, 2022 – March, 2025

- Led the development and integration of tax filing solutions for Croatia, Argentina, and Singapore with the SAP Document & Reporting Compliance platform, streamlining compliance for global enterprises and **reducing manual reporting efforts by 50%**.
- Simplified the **GSTR filing and financial analytics** to ensure compliance for Indian enterprises at scale using Java, SpringBoot, and SAP Analytics Cloud.

Associate Software Engineer - [HighRadius](#) July, 2020 - July, 2022

- Optimized client onboarding, consultation, and infrastructure processes, improving admin efficiency by **40-50%** and reducing support ticket volume through automated admin modules.
- **Built a data-driven, AI-enabled FinTech B2B cloud application** with an integrated ML model, chatbot, and interactive analytics for Receivables management and prediction.
- **Mentored a team of 10 developers** as a Pod Lead in an agile setup, contributing to sprint planning, execution, and delivery.

PROJECTS

- **Master's Dissertation** – [Gamified Cloud Application for Product Roadmap Management](#) (2025)
- **M-E-T-A ([Github Repository](#))** – Winner of 10th Project Innovation Contest, KIIT (2021)
- Other Projects - <https://bhanu155.github.io/projects.html>

ACADEMICS

BITS Pilani | M.Tech (Software Engineering) | 2023-2025 | CGPA: **8.25**

KIIT University | B.Tech (Computer Science) | 2017-2021 | CGPA: **9.04**

Kendriya Vidyalaya | XII (CBSE) | 2016 | **90.40 %**

Kendriya Vidyalaya | X (CBSE) | 2014 | CGPA: **9.8**
